

Act for Our Future Pledge

I, _____, affirm that as an elected official of Washington State, I will support legislation that:

- 1. Immediately halts all new fossil fuel infrastructure in our state;**
- 2. Commits Washington State to an economy running on 100% renewables by 2028;**
- 3. Addresses the need to plant 1 billion trees in WA to sequester CO₂.**

I understand that as an elected official of Washington State, I hold power at a critical moment in human history. I hold a position of leadership during what Governor Inslee called “the first generation to feel the impact of climate change, and the last generation that can do something about it.” I understand that the climate clock is running down; there can be no excuses. **We need bold climate action now.**

I further understand that atmospheric CO₂ levels currently exceed 400 parts per million (ppm) and that to achieve climate recovery, the leading climate scientists say we need to reduce our CO₂ levels to below 350 ppm by the end of this century. This goal is feasible, if challenging. I understand it will require a rapid transition off gas, oil, and coal, and forest and agricultural practices that sequester carbon. Therefore, I commit to upholding the right of young people and future generations to a stable climate by sponsoring and supporting science-based climate legislation.
